Nighthawk® X4S Tri-Band WiFi Mesh Extender

Smart Roaming with One WiFi Name

Nighthawk® X4S Wall-Plug Tri-band WiFi Mesh Extender provides better WiFi speeds to hard-to-reach areas of your home. This Nighthawk Mesh Extender creates powerful whole home WiFi up to 100% faster speeds than Dual-Band Range Extenders.†

Nighthawk® X4S with FastLane3™ Technology delivers super-fast Tri-Band WiFi with combined speeds up to 2.2Gbps. It uses your existing WiFi to easily extend coverage of your home’s WiFi at a touch of a button.

Enjoy seamless WiFi like never before with the same WiFi name and password. Now, you can move from room-to-room while streaming video on your mobile device or stay on a video call without interruptions.
NIGHTHAWK MESH WIFI
• Easily create a whole home WiFi system with your existing router
• Extends coverage of your home’s WiFi with same WiFi name & security password
• Uninterrupted 4K video streaming as you roam room-to-room
• Push button setup

FASTLANE3™ TECHNOLOGY
• Super-fast Tri-band WiFi with combined speeds up to 2.2Gbps
• Dedicated WiFi link avoids cutting the extended WiFi bandwidth in half
• Four high-performance internal antennas for extended WiFi coverage

ULTIMATE CONNECTIVITY
• Smart Roaming automatically connects your mobile devices to the best available WiFi
• Quad-core processor for seamless 4K video streaming & lag-free gaming
• MU-MIMO enables simultaneous streaming of data for multiple devices
• Boost the range of your WiFi to every corner of your home
Nighthawk® X4S Tri-Band WiFi Mesh Extender

The NETGEAR patented FastLane3 Technology is comprised of Tri-band WiFi that creates a dedicated WiFi link between the extender and router and an optimized antenna design in the extender, giving you more speed to more devices. These elements combined create a powerful solution to extend WiFi throughout your home.

<table>
<thead>
<tr>
<th>FASTLANE</th>
<th>FASTLANE3 Technology</th>
</tr>
</thead>
<tbody>
<tr>
<td>This feature maximizes performance by limiting devices to one band. Only one band is available for devices to use while the other one is dedicated to connection to the router. FastLane needs to be enabled in the GUI.</td>
<td>This feature maximizes performance using dedicated third band for connecting to the router. Devices get to use both 2.4GHz and 5GHz bands of the extender for connection. By using dedicated band, there is little performance impact when new clients join the network. FastLane3 Technology is automatically enabled.</td>
</tr>
<tr>
<td>Use case: More bandwidth for more devices.</td>
<td>Use case: Enhances your gaming and streaming experience.</td>
</tr>
</tbody>
</table>

More Coverage. Smart Roaming. One WiFi Name.

Up to 100% faster than Dual-Band Range Extenders†
Nighthawk App

The NETGEAR Nighthawk® App makes it easy to set up your extender and get more out of your WiFi, with the app, you can install your extender in a few steps—just connect your mobile device to the router network and the app will walk you through the rest. Once set up, you can use the intuitive dashboard to pause the Internet on your connected devices, run a quick Internet speed test, setup smart parental controls and much more.

- Quick Setup—Get connected in just minutes
- WiFi Settings—View your WiFi network name (SSID) and password
- Device List—Check devices connected to the extender
- Network Map—View extenders connected to the network
This product comes with a limited warranty that is valid only if purchased from a NETGEAR authorized reseller.

*90-day complimentary technical support following purchase from a NETGEAR authorized reseller.

*Works with devices supporting Wi-Fi Protected Setup® (WPS).

*Comparable with an AC1200 WiFi Range Extender.

*Maximum wireless signal rate derived from IEEE® 802.11 specifications. Actual data throughput and wireless coverage will vary and may be lowered by network and environmental conditions, including network traffic volume and building construction. Data throughput, signal range, and wireless coverage per sq. ft. are not guaranteed and may vary due to differences in operating environments of wireless networks, including without limitation building materials and wireless interference. Specifications are subject to change without notice. The product may not be compatible with routers or gateways with firmware that has been altered, is based on open source programs, or is non-standard or outdated.
