Dynamic Quality of Service

If you like gaming and streaming videos, then you’ll benefit from Dynamic Quality of Service (QoS). Dynamic QoS resolves Internet traffic congestion when you have competing Internet demands at home. Dynamic QoS identifies your online activities by application and device, and then utilizes bandwidth allocation, and traffic prioritization techniques, to automatically allocate more bandwidth to latency sensitive applications like online gaming and video streaming, while ensuring that lower priority applications continue to work.
Nighthawk® App

The NETGEAR Nighthawk® App makes it easy to set up your router and get more out of your WiFi. With the app, you can install your router in a few steps—just connect your mobile device to the router network and the app will walk you through the rest. Once set up, you can use the intuitive dashboard to pause the Internet on your connected devices, run a quick Internet speed test, setup smart parental controls and much more.

• Anywhere Access—Easily monitor your home network anytime, anywhere
• Internet Speed Test—Check the broadband speeds from your service provider
• Pause Internet—Pause the Internet to any device
• Traffic Meter—Track Internet data usage
• Guest Networks—Set up separate WiFi access for guests
• Quick Setup—Get connected in just minutes
• Get it at nighthawk-app.com

NETGEAR Armor™

NETGEAR Armor empowers you to eliminate vulnerabilities or simply know the status of your home network and devices, anytime, anywhere. Get instant notifications when malicious threats are detected, block unknown devices from joining your home network or take action on vulnerabilities as they are discovered easily through the Nighthawk App.

Powerful Security on Your NETGEAR Router

- **ANTIVIRUS & RANSOMWARE PROTECTION**—Keeps you safe from phishing and online fraud
- **VULNERABILITY ASSESSMENT**—Scans and identifies network security flaws
- **BITDEFENDER SECURITY**—Protects all connected devices at home and on-the-go
- **BITDEFENDER VPN**—Encrypts your internet connection to keep your online activity private even while you’re on unsecured public networks
